DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to the apparatus, classified in class 297, subclass 217.3.
 - II. Claims 17-20, drawn to the method, classified in class 29, subclass 401.1.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process of adapting the telephone system to a seat can be applied with a radio or television system.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Mark Elchuk (#33,686) on July 10, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made

Art Unit: 3636

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
